

Case Study: Thyroid

Shanae's Story

I came into Thrive exhausted and in pain. I had done everything my medical doctor recommended, and it would help for a little while and then taper off. When I met the Thrive doctor, they walked me through the ups and downs of my graves disease, anemia, hypoglycemia and so much more.

A few months after my first blood results, we did another set and the before and afters are unreal. Almost everything that was too high on my panel was cut in half! I have my energy, memory and life back! What they do here is amazing and truly life changing. I couldn't be more grateful to have found them.

Complaints

- Low Energy
- Headaches
- Poor Memory
- Graves Disease

Solution

- Spinal Adjustments
- Functional Movement Training
- Functional Medicine

Results

- No Migraines
- Graves Markers Cut In Half
- Energy Back

Doctor's Story

Shanae came to us with a previous diagnosis of Graves Disease, which is where the immune cells attack the thyroid until there is nothing left. She had started her own hair salon, and was struggling to have the energy to do anything, and was experiencing constant headaches that made it hard to focus. We took x-rays and ran blood work and found that the curve in her neck was lost by 87.6%, contributing to her headaches. We also found that her Graves markers were 1512 (should be under 34) and 390 (should be under 115).

We immediately started with adjustments, functional movement training and massage for 6 months. Within 6 months, the headaches were gone and she saw a 38.5% improvement in her x-rays with minimal home exercise. Her follow up lab results showed that her Graves markers went from 1512 to 239 and that was only 3 months worth of following the Functional Medicine protocol.

Every Patient Is Different. This Is Not A Guarantee Of Results. You may get better or worse results depending on a variety of variables.

Case Study: Thyroid

Diagnostics: Before And After Treatment

1: Side View of Your Neck on 2/5/2018

Front Back

2: Side View of Your Neck on 8/21/2018

Front Back

Anti-TPO (IU/mL)

239 H

≤34

1512 H (05/16/2018)

Forward Head
Posture Improved
29.7%

Neck Curve
Improved 38.5%

Anti-TPO Went From
1512 To 239

Key Points

- Health Is Not ONE Thing. This Patient Had Multiple Problems, And Needed A Comprehensive Approach To Get Healthy Again
- A Functional Medicine And Structural Approach Worked For This Patient. We're Thrilled For You Shanae!
