

# Case Study: Sciatica

Ron's Story

Hi my name is Ron Wesley. I am a working musician and audio engineer. So lifting heavy gear is a large part of my life. Two years ago I injured my lower back seriously and was in pain and had no strength in my left leg. This went on for a year. At the same time I went through radiation to address other health matters.

A friend begged me for a year to go to Thrive and I finally did! The first treatment lowered my pain level more than half. Since then, with continuing treatment, I am mostly out of pain and have my strength back! I tell everyone my story and urge all to go and give Thrive a chance to help you!

## Complaints

- Back Pain
- Leg Weakness

## Solution

- Spinal Alignment
- FMT
- LDX

## Results

- Pain Reduced
- Back To Work
- Got His Life Back

## Doctor's Story

Ron originally presented to Thrive displaying severe leg weakness and back pain. At the time, he was being treated by another chiropractor in town but was referred to our office by a friend.

Ron could not walk, had difficulty standing up straight, and he felt that his pain was something that would never go away. After one treatment he felt a significant decrease in pain. We put together a plan that included spinal adjustments, LDX, and Functional Movement Training. Through his course of treatment, he has been able to overcome his previous pain syndrome and get his life back. He has been able to go back to work and continue playing music, which were all activities that he was unable to do before treatment with us.

HEALTH SYSTEMS

Every Patient Is Different. This Is Not A Guarantee Of Results. You may get better or worse results depending on a variety of variables.

# Case Study: Sciatica

## Diagnostics: Before And After Treatment

1: Lateral Cervical 10/5/2017

Anterior

Posterior

2: Lateral Cervical 2/12/2018

Anterior

Posterior

Overall Neck Curve  
Improved 67%

Lumbar Curve  
Improved 85%

Pain Gone,  
Mobility Improved!

### Key Points

- The Only Difference Between A Small Problem And A Big Problem Is Time And Repetition. Like A Water Drip, Small Problems Become Big Problems When Not Addressed Quickly.
- A Simple Protocol Of Spinal Alignment, Traction Therapy, And Time Worked To Get This Patient Results. Way To Go Ron!
