

Case Study: Migraines

S.K.'s Story

Coming back from camping after Labor Day weekend, my girlfriend and I were struck by a drunk driver in a head-on collision at highway speeds. My head slammed into the steering wheel which resulted in a concussion and severe whiplash. Afterwards I experienced neck pain, Migraines, back pain, and joint pain, especially sharp, shooting pain to my left knee.

I'm now so grateful to have come across Thrive. I'm grateful for the variety of different therapies and services. The doctor was exceptional in treating my pain and identifying the best way forward to correct the position of my neck and spine due to the accident. I believe that the thorough investigation of my symptoms, with periodic X-rays and evaluations throughout treatment, was instrumental in my recovery. Thank you so much for support in this challenging circumstance, my body and mind are forever grateful.

Complaints

- Migraines
- Neck Pain
- Back Pain
- Poor Sleep

Solution

- Spinal Adjustments
- CBP Traction
- Laser Therapy

Results

- Migraines Gone
- Neck Pain 1/10
- Back Pain 1/10
- Sleeping Well!

Doctor's Story

S.K. presented to the office after a drunk driver hit him head on at 60 mph. He was experiencing depression, anxiety, migraines, neck pain, mid back pain, low back pain and difficulty sleeping. He had not experienced these symptoms prior to the accident.

After an exam and diagnostics, we began with a protocol of spinal adjustments and laser treatments, as well as spinal molding tools. During that time, we saw improvement both in symptoms and x-rays. We then hit a plateau, and added cervical traction and lumbar traction to his care to create more progress in his lumbar and cervical curves. Within just the first 30 days, his head forward posture improved 15.5%, and cervical curve improved 200%, and is feeling much better.

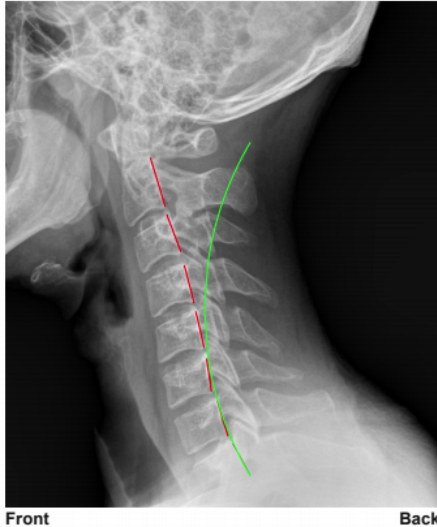

Every Patient Is Different. This Is Not A Guarantee Of Results. You may get better or worse results depending on a variety of variables.

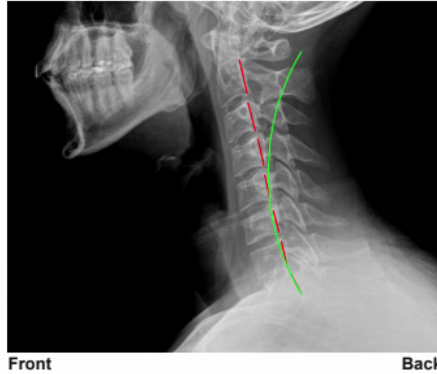

Case Study: Back Pain

Diagnostics: Before And After Treatment

1: Side View of Your Neck on 9/28/2018

2: Side View of Your Neck on 10/27/2018

Overall Neck Curve
Improved 200%

Forward Head
Posture Improved
15.5%

Migraines Gone,
Pain Reduced,
To 1/10

Key Points

- Vehicle Accidents Can Be Violent, And Cause Long-Term Health Problems If Not Addressed
- This Patient Walked Away From The Accident With Pain "All Over", And Needed An "All Over" Solution
- An Approach That Corrected The Problem Got S.K. The Results He Wanted. Nice Work S.K.!
